Experience

Frontend Developer Internship

Jan 2023 - Current

Frontend Simplified PTY LTD

- Transformed a static HTML, CSS, JavaScript, and React single-page application into a captivating user interface through the implementation of animations, seamless transitions, and engaging carousels; user engagement increased by 50% and bounce rate decreased by 25%.
- Used Axios to make real-time API requests, resulting in a smooth, engaging user experience with a 20% increase in engagement.
- Collaborated with team members using Git version control; success rate: 99%.

Freelance Frontend Developer

May 2023 - Current

Self-Employed

- Delivered professional websites using HTML5, CSS3 (+ SCSS, BEM), JavaScript, TypeScript, React, and Next.js best practices.
- Improved website performance by reducing image file sizes, caching static assets, and lazy loading images and components. This accomplished 20% decrease in page load times and a 15% increase in user satisfaction.
- Optimized the website for search engines, made it responsive to all devices, and supported multiple platforms; resulting in a 98% global reach and over 100 device compatibility.

Projects

Full Stack E-Commerce | [Website](#) | [GitHub](#)

- Engineered a high-performing E-Commerce app with 10+ features, including Google Sign-In, filtering, search, payments, order confirmation, and pagination.
- Integrated a database to create personalized user profiles for each user, resulting in a 20% increase in user engagement and a 15% decrease in bounce rate.
- I developed the app using TypeScript, Next.js, Next-Auth, Axios, Styled Components, and MongoDB.

NFT Trading Platform | [Website](#) | [GitHub](#)

- Created an immersive NFT trading platform with a variety of features including Top Creators, Trending NFTs, Explore Page, Filtering, and Animation.
- Utilized React, JavaScript, Bootstrap, and HTML to develop an intuitive and engaging application that wowed users with its slick design and easy-to-use interface.

Apple Clone | [Website](#) | [GitHub](#)

- Concocted a visually stunning Apple clone using TypeScript, CSS, HTML, and React that received over 100 visitors in its first month. I received many compliments for the realistic design of the clone.
- I implemented responsiveness, which drastically improved the immersive user experience.

E-Portfolio | [Website](#) | [GitHub](#)

- Developed a cutting-edge, personalized frontend portfolio showcasing skills and projects using HTML, JavaScript, Tailwind CSS, React, Framer Motion animations, and EmailJS; garnered 50% increase in client inquiries and led to 3 new project collaborations
- Invented a responsive and visually appealing user experience that boosted user engagement by 20% and decreased bounce rate by 15%

Education

Frontend Developer Bootcamp

Oct 2022 – Jun 2023

Frontend Simplified

Technical Skills

Languages: HTML5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+ | Typescript | Tailwind CSS | Styled Components

Frameworks: React (+ hooks) | Next.js | Material-UI | Redux | Bootstrap

Technology: NPM | Git | Yarn | React dev tools | Firebase v9 | MongoDB | GitHub | Node.js
